

# SPCA's comparative analysis of real rabbit fur, synthetic fur and 'rabbit bag chain' fur

The SPCA conducted in house tests on the samples including the feel test, pin test, burn test and a microscopic examination. Our results indicate that the 'rabbit bag chain' is made of real animal fur. See below for examples from our microscopy test comparing fibre morphology.

Real rabbit fur	Sample A - Synthetic fur	Sample B - 'Rabbit bag chain' fur
 <p data-bbox="336 775 475 801">Tapered ends</p>	 <p data-bbox="933 768 1093 793">Uniformed ends</p>	 <p data-bbox="1499 768 1634 793">Tapered ends</p>
 <p data-bbox="282 1293 533 1319">Internal fibre morphology</p>	 <p data-bbox="890 1310 1141 1336">Internal fibre morphology</p>	 <p data-bbox="1441 1296 1692 1322">Internal fibre morphology</p>
